1956 CLASS SUMMARY

"IN LANDS AFAR shineth thy star" can well continue to be sung, for the Class of 1956 is scattered throughout all the United States of America and the world — in 29 states, District of Columbia, Alaska, and 11 other countries (England 6, Turkey 5, Formosa 3, Australia, Germany and Japan, 2 each, Italy, Ceylon, Belgium, Philippines, France). A total of 27 are studying or working abroad. In addition, 26 spent the summer (or fall) traveling (including workcamps) in Europe (20), Mexico (4), and Alaska (2).

Distribution

In the United States, the largest number (71) are located in New York state, while Ohio has 60, Massachusetts 40, Illinois 31, California 18, Michigan 17, Connecticut, Pennsylvania and District of Columbia 14 each, New Jersey 12, and the rest scatter from Florida to Arizona and Oregon to Vermont.

Marriages

The national trend toward early marriage is reflected by the fact that 23% (30 men, 43 women) are married — on-third of them while they were students at Oberlin. Twelve couples are classmates, 29 married Oberlinians from other classes (including 12 from '55 and 7 from '57) and 20 have taken "non-Oberlin" wives or husbands. They already have at least 11 "class children" with several others expected soon. However, only eight girls are fulltime homemakers — 6 are continuing study, 13 teaching, and 12 in office and other jobs, and 5 have not reported their activities.

Employment Aid

Employment was secured through a variety of sources, with the largest number (29%) finding jobs through notices from the Bureau of Appointments and major departments. The Bureau of Appointments worked with most of the employed group on their plans, but the specific jobs for 19% came through direct application by letter or in person, for 10% through information from friends (often Oberlin graduates or students), for 8% through relatives, and for the others through advertisements, other college placement services, agencies, Mock Convention and Career Conference contacts, Civil Service examinations, or "pavement pounding."

Salaries

Again reflecting the national trend, beginning salaries are higher than in 1955. Since the salaries abroad are difficult to estimate accurately, our study includes only positions in the United States. These range from \$2,800-\$4,100 for elementary and secondary teachers, \$2,400-\$4,425 for music teachers, \$2,100-\$4,400 for women and \$3,600-\$6,000 for men in business and industry, and \$2,300-\$4,900 for other fields (social work, government, science, etc.). Median salaries for teachers increased by \$500 over 1955 — to \$3,800 for elementary and secondary and \$3,900 for music teachers. For other occupations the median for men was \$4,800 (as compared to \$3,600 in 1955) and for women \$3,180 (as compared to \$2,760 in 1955).

COLLEGE OF ARTS AND SCIENCES

The occupational distribution of the men of 1956 closely follows the pattern for 1955 — 66% study, 22% em-

ployed, 8% military service, and the others (4%) waiting service, "unsettled" or not reporting. (Several men in the AFROTC who are listed as employed will be called for active duty before spring). On the other hand, the percentage of women in graduate study dropped from 31% to 29%, while employment rose from 55% to 60%; another 4% do not plan to work, 4% are "unsettled" — job plans delayed because of marriage, travel, etc. — and 2% gave us no information.

Post-Collegiate Study

The post-collegiate study group includes 104 men and 43 women. Ninety-two are in academic fields — sciences 30, social sciences 24, languages 11, education 11, fine arts 5, psychology 5, mathematics 3, speech 2 — a total of 27 specific fields. Fifty-two others are in professional study — medicine 18, law 11, theology 7, business administration 6, engineering 2, interior decoration 2, architecture, retailing, vocational rehabilitation, social work, journalism, nursing, — and 4 girls are enrolled for secretarial study.

Sixty-five (42 men, 23 women) of the 147, who are studying are financing part or all of their expenses with graduate awards varying from \$300 to full expenses (several renewable for later years of study). Of these 25 (18 men, 7 women) hold assistantships and 26 (14 men, 12 women) scholarships or fellowships awarded by the graduate schools. Fourteen (10 men, 4 women) won fellowships — Fulbright, Marshall, and Rhodes for study abroad; National Science Foundation, Social Science Research Council, Woodrow Wilson, Ford Foundation, and Atomic Energy Commission for study in the United States.

The class has scattered to 65 schools — 54 colleges and universities and 5 special schools in the United States and 6 abroad (England, Australia, Italy, Belgium, Germany). However, as usual, almost half of the graduate students are concentrated — this year in 9 schools, Harvard 10, Chicago 10, Johns Hopkins 8, Western Reserve 7, New York 6, Michigan 6, Yale 5, Oberlin 5, and Illinois 4.

Employment

One hundred and twenty-five (34 men, 91 women) are employed. The men are in training programs in business, production, and industrial management, sales, insurance, retailing, and personnel. Other employment includes security analysis, electrical engineering (M.I.T.-Oberlin graduate), physical and biological research, teaching, commercial art, government service, journalism, college personnel, and "short-term" and "bread and butter" jobs while waiting for military service or "the breaks" in the theater.

Of the 32 girls teaching, 18 are in kindergarten-primary positions; 8 are teaching English (and other subjects) in schools in Japan, Philippines, Turkey, and Formosa; and 6 are teaching in high school and special subjects (art, physical education). Thirty-three are employed in office and general business positions — 19 as secretaries and office assistants in business firms and colleges, public administration organizations, and medical offices; 14 others in claims and underwriting of insurance, personnel, retailing office machines systems service, telephone service, representative, security analysis, statistics, public relations, and banking. There are 9 scientists (in medical, chemical, and biological research); 6 social workers; 3 editorial and 3 library assistants, and others in commercial art, drafting, YWCA, recreation, government, and (for the month of October at least), on the office staffs of candidates for president.

Military Service

Thirteen men are now in service — Army 6, Air Force 5, Navy 2. Several others are expecting to be drafted or to be called to active duty in the Air Force early in 1957.

CONSERVATORY OF MUSIC

Since the Conservatory is a "professional" school, their graduates almost always intend to enter some type of music occupation, and with the increasing demand for advanced degrees for music teachers, a large number each year (particularly of the men) plan on graduate study. Of the 18 men receiving Conservatory degrees, 11 are studying, 5 are in military service, 1 is teaching music education, and 1 is playing in a symphony orchestra. For the women, 19 are teaching music (14 of them in public schools), 14 are studying, 1 is a professional harpist, 7 are in "non-music" positions (by choice or because a music job is not available

where the husband is located), and 2 are "homemakers."

Graduate study fields are piano 12, voice 3, organ 3, cello 2, music education 2, musicology 2, and flute 1. Fourteen music schools in the United States and France are represented, with the largest number (7) remaining at Oberlin for further study. Almost half (11) of the music graduate study group have scholarships or assistantships ranging from part tuition to \$1,500 in value.

Dorothy M. Smith, '29, has been Director of the Bureau of Appointments since 1948 and associated with it in one capacity or another since her initial appointment as secretary and assistant to the Director of Admissions in 1930. She is president of the Ohio Institutional Teacher Placement Association and has been active on committees of various placement and guidance organizations. In recent years she has had a large share in developing the Men's and Women's Career Conferences at Oberlin, which have played an important part in vocational guidance.

"The job is completely absorbing—I began as an assistant to the assistant to the Assistant Dean for Academic Affairs, and after several people left, became the assistant to the Assistant Dean. The job is varied — I help students plan programs; keep student records; work with the Admissions Office; am 'managing editor' of the catalogue for the Graduate School of Business; arrange exams, proctors, etc. . . ." In addition, Winnie is taking a graduate course in English literature, which is a start on a master's degree.

ANTHONY, JEAN S. — Baika Jo Gakuen, Toyonaka, Osaka-fu, Japan. Jean writes: "I left the U.S. from Seattle on August 3 aboard the Hikawa Maru, a Japanese passenger boat; arrived in Yokohama on August 17 and went to Nojiri, a beautiful place in the mountains on a lake, where many missionaries go for the summer. One of the first persons to greet me there was Ray Downs, '54 (who went back to the States on the Hikawa's return voyage). Other Oberlin people I found here were Rev. Frank Cary, '16, and Mr., '47, and Mrs. John Fairfield (Betty Smith, '48).

"Baika has a high school which covers six grades and a junior college. I teach Eng-

lish Conversation to 12 different classes for one hour a week and to two classes for two hours a week. Japanese teachers give the girls the rest of their English lessons and my part is to make sure they understand and can speak properly. Baika is a private school, but is affiliated with the United Church of Christ in Japan. However, all the teachers and students are not Christians. There is much talk about a building program and ways and means to raise money. . . . All have been so friendly and helpful — teachers meetings are faithfully translated and so are college chapels. I have begun again with my Japanese lessons in high hopes to at least be able to find my way home in the dark. . . . I am looking forward to being here for the next three years."

As a result, here I am at the headquarters of the Stevenson-Kefauver Campaign Committee — at least until Nov. 5. During the summer I worked on a full-time volunteer basis with the information cards we kept on each delegate to the Democratic Convention. Very interesting and particularly exciting during the week of the Convention when I worked in the Astoria room (just off the main Stevenson Headquarters) at the Conrad Hilton. . . . After the election, I go home to prepare for Europe — leave in January for a year of improving my French, working with a refugee organization (I hope), visiting Oberlin friends abroad, and traveling in general." I have a room with a New Australian family (Hungarian) and am sharing quarters with another Fulbrighter (from Cornell). The only real problem we have is selecting among the many invitations we receive from people — I was rightly informed that Australians are friendly. . . . I am going to the Olympic Games — am booked up solidly for all 16 days of the event. In January I plan to spend a few weeks in Tasmania and then to visit a friend from the Oronsay in Adelaide. At the end of January I'll attend a conference in Canberra and about May go to North Queensland and the Barrier Reef. Don't laugh, but I've already booked passage home — you have to, there's such a rush. I'll leave Sydney on Aug. 20, 1957 and go to Marseilles.
